# LumiFind – Smart Offline AI Search

Find anything. Keep everything private.

**https://lumifind.midilli.tech**

- Search across local documents, images, voice recordings, videos, emails, and source code. Multilingual support included.
- Your device is stronger than you think. All processing stays local so your data remains entirely yours.
- Works also with remote drives and cloud folders.
- No expertise required. The Welcome Wizard prepares everything for the ideal first setup.

- Frequently updated files are no problem. Incremental analysis makes repeated indexing dramatically faster.
- Custom AI-models can be integrated as well.
- If your document, voice, or video is in another language, search it in a different language. *Missplelings* are also no problem.
- Lifetime license with device transfer. Available for Windows, macOS, and Linux.
